Bagheera Stream O2 Oxygen Therapy Bag for 2-Liter Cylinder

The **Bagheera Stream O2 oxygen therapy bag for 2-liter cylinders** is designed to neatly organize and transport an oxygen cylinder and the equipment needed for first aid and emergency care.

This model is part of the **first generation of Bagheera oxygen therapy bags** and features a design that differs from the versions currently offered by the brand.

With a volume of **42 liters**, it offers ample space for storing equipment while maintaining a size optimized for transport in the field.

Reinforced protection for the oxygen cylinder

The 2-liter cylinder is secured inside the bag by a **dedicated fastening system**.

A **removable rigid bracket** helps protect the cylinder during transport. The bottom of the bag is also reinforced with compact foam designed to absorb shocks during handling.

Organized storage for oxygen therapy equipment

The interior of the bag features several compartments that allow you to organize the equipment and access it quickly during a procedure.

- **1 holding system for a 2 L oxygen cylinder**
- **3 mesh pockets on each side**
- Velcro fasteners for organizing equipment
- **2 fixed** mesh**pockets** with a transparent front panel on the flap
- **1 large document pocket**

Backpack-style carrying and field use

The bag features an **ergonomic backpack design with a waist belt** that makes it easy to move around and keeps your hands free.

Handles also allow it to be carried by hand. A **helicopter winch strap** is integrated for situations requiring this type of handling.

A removable pocket designed for a CO detector can be attached to a shoulder strap.

External attachments and bag protection

Both sides are equipped with a **MOLLE-style attachment system**, allowing compatible accessories to be added as needed for the mission.

The perimeter and sides of the bag are reinforced with foam. Bottom feet limit direct contact with the ground and help protect the bag during operations.

A label holder also makes it easy to identify the bag and its assignment.
