Xenon 6054 Peli™ bulb for LaserPro™ lamp

Xenon double filament lamp module PELI 6054 - For LaserPro™ Rechargeable lamp

Description

The **PELI 6054** is a replacement lamp module with **double Xenon filament**, intended only for Peli™ brand **LaserPro™** rechargeable flashlights. This type of lighting offers high light output and an adjustable beam, ideal for professionals working in dark, technical or industrial environments.

Key features

- Compatibility: **Peli™ LaserPro™ Rechargeable only**
- Type: **double-filament Xenon lamp module**
- Operation: with **Ni-Cad rechargeable battery** (battery pack required)
- **Guaranteed life:** up to 60 hours
- Manufacture: **Made in USA**

Replacement instructions

1. Unscrew and remove lens, reflector and focus spring.
2. Press down on the bulb and turn it counter-clockwise to remove.
3. Insert the new bulb, following the same steps in reverse.
4. Adjust focus by turning the lens until it stops, then back off slightly.
5. The focus may change slightly with a new filament.

Additional information

- **Brand :** Peli™
- **Manufacturer's reference:** 6054
- **Bar code (EAN):** 0019428019488
- **Production year:** 2004
- **Manufacturing:** USA

Advantages of double Xenon filament

Dual Xenon filaments provide useful redundancy to maintain lighting even if one filament fails, increasing product **life** and **reliability**. This makes it an ideal solution for security, industrial and maintenance professionals.

Compatibility

This module is designed exclusively for use with **Peli™ LaserPro™** rechargeable flashlights operating with a **Ni-Cad battery pack**.
