

## Handheld nozzle AKRON TurboJet 1720

### Product features:

Material: Pyrolite  
 Length: 241 mm  
 Flow range: 100 - 200 - 300 - 450 LPM @ 6 bars (CE version)  
 Flow range: 115 - 230 - 360 - 475 @ 7 & 5 bars (non CE)  
 Weight: 1.8 kg  
 Manufacturer's warranty: 10 years  
 Inlet diameter: 1.5" (DN40)  
 Certification: CE Standard EN 15182  
 Certification: US: NFPA 1964  
 Certification: FM approved  
 Certification: SOLAS approved

Reference: -  
 EAN13: -

Flow range: 100 - 200 - 300 - 450 LPM @ 6 bars, 115 - 230 - 360 - 475 LPM @ 5 and 7 bars  
 Connection: sans raccord, including: Storz 65

### Why choose the handheld nozzle AKRON Turbojet 1720?

The Turbojet 1720 stands out for its advanced features, guaranteeing reliable performance and simplified use in the field. Key benefits include:

- **Adjustable flow rates** for precise adaptation to each job.
- **Modular jet system** for fast switching between straight and diffused jets.
- **Robust Pyrolite design**, ensuring resistance to extreme conditions.
- **Ergonomic grip** for greater comfort and reduced user fatigue.

### Turbojet 1720 technical specifications

	115, 230, 360 or 475 liters per minute at 7 bars, for optimum adaptation to different intervention situations.

<i>Jet type</i>	Possibility of switching from a powerful straight jet to a diffused jet, with a quarter-turn rotation, facilitating rapid adjustment of the jet shape.
<i>Materials</i>	Extruded Pyrolite body and sleeve, for lightness and robustness, adapted to demanding conditions.
<i>Maximum pressure</i>	Withstands a maximum operating pressure of 7 bar, guaranteeing reliable performance even in high-pressure situations.
<i>Maximum pressure</i>	Rubber bumper with raised lug for tactile identification of spray pattern, ideal for operations with reduced visibility.

## Recommended applications

- **Urban fires:** Adaptable flow rates and spray patterns for maximum efficiency in built-up environments.
- **Industrial fires:** Ability to handle high pressures and deliver high flow rates to control complex fires.
- **Interventions in confined environments:** Precise jet control to minimize collateral damage and maximize responder safety.

## Why choose MMF Protection et Sécurité?

As Akron Brass' **main dealer** and **authorized repair center** in France, MMF Protection et Sécurité guarantees you :

1. **Recognized expertise:** Personalized advice to select the equipment best suited to your specific needs.
2. **Dedicated after-sales service:** Maintenance and repairs carried out by certified technicians to guarantee the longevity of your equipment.
3. **Spare parts availability:** Quick access to essential components to minimize equipment downtime.

For further information or to order the **Turbojet 1720**, please contact **MMF Protection et Sécurité** Akron Brass, your trusted partner for Akron Brass equipment.
