

Monitor nozzle AkroMatic 5170 Master Stream 2000

Product features:

Control: Manuel
 Material: Pyrolite
 Length: 232 mm
 Flow range: 1900 - 7600 L/min @ 5.5 bar
 Weight: 6.9 kg
 Inlet diameter: 3.5 " (DN 90) NH

Reference: 21470
 EAN13: -

Monitor nozzle AkroMatic 5170 Master Stream 2000 by Akron Brass: performance and versatility

The monitor nozzle **AkroMatic 5170 Master Stream 2000** from **Akron Brass** is essential equipment for fire-fighting professionals. Designed to deliver precise, controlled water distribution, it is ideal for rapidly bringing fires under control in demanding conditions. **MMF Protection et Sécurité** is your authorized partner for this product, offering expertise and quality service. Made from high-quality materials, it guarantees durability and resistance, even under high pressure. Its innovative design enables precise, controlled water distribution, essential for rapid fire control.

Preferred contexts of use

The monitor nozzle **AkroMatic 5170 Master Stream 2000** is particularly well suited to operations requiring high jet power and precision water distribution. It is ideal for :

- **Industrial applications:** adapted to industrial environments where fires can be intense and require a fast, powerful response.
- **Urban fires:** its ability to adjust the flow rate and shape of the jet means it can be used in a wide variety of urban settings.
- **Rescue operations in natural environments:** when used on all-terrain vehicles, it is ideal for fighting forest fires and rural wildfires.

Assets for professional use

The monitor nozzle **AkroMatic 5170 Master Stream 2000** offers several key advantages for professionals:

- **Reliability and durability:** designed to withstand the most demanding environments, it guarantees long life and consistent performance.
- **Versatility:** thanks to its flow settings and precise jet control, it adapts to a variety of work situations.
- **Operational efficiency:** its ability to bring fires under control quickly reduces risks to responders and minimizes property damage.
- **Ease of integration:** compatible with various firefighting monitors models, it can be easily integrated with existing equipment, optimizing available resources.

Compatibility with iconic monitors models

The monitor nozzle **AkroMatic 5170 Master Stream 2000** offers compatibility with several models of monitors Akron Brass, depending on operational needs:

- **Monitor Apollo 3436 :** the monitor Apollo is designed for optimum performance in a wide range of conditions. It is often used in industrial and urban applications.
- **Monitor [StreamMaster 3481](#):** This monitor model is designed for exceptional performance and versatility in demanding conditions.

MMF Protection et Sécurité your trusted partner

As an authorized dealer of **Akron Brass**, **MMF Protection et Sécurité** guarantees you authentic, high-quality products. Here's what we offer:

1. **Expertise and personalized advice:** our team is trained to guide you in choosing the equipment best

suited to your specific needs.

2. **Authorized repair center:** we maintain and repair your **Akron Brass** equipment, using original parts to guarantee performance.
3. **Quality commitment:** we are committed to providing quality service, with fast and reliable interventions, to extend the life of your equipment.

In a nutshell

Akron Brass ' monitor nozzle **AkroMatic 5170 Master Stream 2000** is a wise investment for any fire safety professional. Its performance, durability and versatility make it an indispensable piece of equipment for efficient, safe interventions. At **MMF Protection et Sécurité** we are committed to providing you with the best service and products to keep you and your teams safe.
