

Handheld nozzle AKRON Assault 4826

The **Assault 4826 hand-held handheld nozzle from Akron Brass** is a rugged, versatile solution designed to meet the demands of firefighting professionals. Available in France from **MMF Protection et Sécurité** handheld nozzle for optimum efficiency in the field.

Technical specifications handheld nozzle Assault 4826

Features	Description
<i>Jet performance</i>	Ensures optimum jet quality at pressures as low as 3.5 bar, offering increased efficiency during interventions.
<i>Durable design</i>	Simple, robust, low-maintenance structure guarantees exceptional longevity and reliability.
<i>Ease of use</i>	Easy transition from straight to diffused jet thanks to quarter-turn rotation, simplifying field operations.
<i>Tactile identification</i>	Raised markings to identify the straight jet, facilitating use in low-visibility conditions.
<i>Ergonomic handle</i>	Equipped with a pistol-grip handle and rotating teeth, ensuring a comfortable grip and improved performance.

handheld nozzle Assault 4826 benefits

- **Operational versatility:** Adapted to a variety of pressures and flow rates, handheld nozzle 4826 meets the diverse needs of fire-fighting operations.
- **Easy training:** Thanks to its intuitive design, team training is simplified, enabling fast, efficient implementation.
- **Reduced maintenance:** The durable structure of handheld nozzle minimizes maintenance requirements, ensuring constant equipment availability.
- **Increased efficiency:** Design features such as easy transition between jet types and tactile identification improve efficiency in the field.

Recommended applications

The **handheld nozzle Assault 4826** is particularly suitable for :

- **Industrial fires:** Its ability to operate efficiently at low pressure makes it ideal for complex sites requiring suitable pressure.
- **Urban response:** Versatile flow rates and easy handling make it a valuable tool for municipal fire departments.
- **Low-visibility situations:** Tactile markers enable effective use even in low-light conditions or dense smoke.

Why choose MMF Protection et Sécurité?

As Akron Brass' **main dealer** and **authorized repair center** in France, MMF Protection et Sécurité offers :

- **Technical expertise:** Specialized advice to select the equipment best suited to your specific needs.
- **Responsive after-sales service:** Maintenance and repairs carried out by certified technicians, guaranteeing the longevity of your equipment.
- **Spare parts availability:** Quick access to essential components to minimize downtime with a wide range of parts available from stock.
