

Firefighting monitor AKRON DeckMaster 3440

Firefighting monitor AKRON DeckMaster 3440: a high-performance solution

The AKRON **DeckMaster 3440** is a high-tech firefighting monitor designed to meet the requirements of fire-fighting professionals. With its innovative design and advanced features, it guarantees unrivalled performance for safe, effective intervention.

DeckMaster 3440 highlights

The monitor AKRON® DeckMaster 3440 stands out for its features tailored to demanding environments:

- **Integrated electrical design:** an elevating mechanism raises the monitor by 60 cm, ideal for working around obstacles.
- **Enhanced precision:** electric control for precise rotation and elevation, enabling rapid adjustment during operations.
- **Extended compatibility:** adaptable to various AKRON accessories, such as nozzles or remote controls.
- **Durable material:** sturdy Pyrolite construction, combining lightness and durability to ensure greater resistance to extreme conditions.
- **Simplified maintenance:** maintenance kits available for longer service life.
- **Simplified installation:** intuitive design for fast, efficient assembly.

Fields of application

The monitor AKRON® DeckMaster 3440 is particularly suitable for :

- **Fire engines** equipped with platforms or structures requiring elevation.
- **Fixed installations** to protect industrial infrastructures, especially petrochemicals.
- **Hard-to-reach areas**, thanks to its flexible positioning.
- **Marine applications**, guaranteeing reliable use in difficult conditions.
