Monitor nozzle AKRON AkroMatic 5178 (with motor)

Monitor nozzle AkroMatic 5178 Master Stream 2000 by Akron Brass: performance and versatility

The monitor nozzle **AkroMatic 5178 Master Stream 2000** fromAkron **Brass** is essential equipment for fire-fighting professionals. Designed to deliver precise, controlled water distribution, it's ideal for rapidly bringing fires under control in demanding conditions. **MMF Protection et Sécurité** is your authorized partner for this product, offering expertise and quality service. Made from high-quality materials, it guarantees durability and resistance, even under high pressure. Its innovative design enables precise, controlled water distribution, essential for rapid fire control.

Technical specifications

Features	Description
Adjustable flow rate	1900 to 7600 LPM (500 to 2000 GPM) at an operating pressure of 80 psi (5.5 bar), for optimum adaptation to different intervention situations.
Jet control	Easily switch between a powerful straight jet and a diffused jet thanks to progressive jet shape control, offering great flexibility in the field.
Construction material	Made from Pyrolite, a lightweight, durable alloy, for enhanced resistance to the demanding conditions of firefighting.
Dimensions and weight	Length 232 mm, weight 6.8 kg, for easy integration on various firefighting monitors.
Compatibility	Adaptable to various firefighting monitors from the **Akron Brass** range, guaranteeing reliable use in all circumstances.
Electrical jet control	Electrical jet control for easy, precise operation.

Preferred application contexts

The monitor nozzle **AkroMatic 5178 Master Stream 2000** is particularly well-suited to operations requiring high jet power and precise water distribution. It is ideal for :

- **Industrial response**: adapted to industrial environments where fires can be intense and require a fast, powerful response.
- **Urban fires**: its ability to adjust the flow rate and shape of the jet means it can be used in a wide variety of urban settings.
- **Rescue operations in natural environments**: when used on all-terrain vehicles, it is ideal for fighting forest fires and rural wildfires.

Assets for professional use

The monitor nozzle **AkroMatic 5178 Master Stream 2000** offers several key advantages for professionals:

- **Reliability and durability**: designed to withstand the most demanding environments, it guarantees long life and consistent performance.
- **Versatility**: thanks to its flow settings and precise jet control, it can be adapted to a variety of work situations.
- **Operational efficiency**: its ability to bring fires under control quickly reduces risks to responders and minimizes property damage.
- **Ease of integration**: compatible with a variety of firefighting monitors, it integrates easily with existing equipment, optimizing available resources.

MMF Protection et Sécurité your trusted partner

As an authorized reseller of the **Akron Brass** brand, Akron Brass, **MMF Protection et Sécurité** guarantees you authentic, high-quality products. Here's what we offer:

1. **Expertise and personalized advice**: our team is trained to guide you in choosing the equipment best suited to your specific needs.
2. **Authorized repair center**: we maintain and repair your **Akron Brass** equipment, using original parts to guarantee performance.
3. **Quality commitment**: we are committed to providing quality service, with fast and reliable interventions, to extend the life of your equipment.

In a nutshell

Akron Brass ' monitor nozzle **AkroMatic 5178 Master Stream 2000** is a wise investment for any fire safety professional. Its performance, durability and versatility make it an indispensable piece of equipment for efficient, safe interventions. At **MMF Protection et Sécurité**we are committed to providing you with the best service and products to keep you and your teams safe.
