Peli 1740 waterproof carrying case

A long format designed for oversized equipment

The **Peli 1740 long waterproof case** stands out for its ability to accommodate equipment that is difficult to transport in conventional formats. Its elongated design allows equipment to be carried along its entire length, reducing packaging and travel constraints.

What kind of equipment can the Peli 1740 carry?

The Peli is ideal for transporting**long technical equipment**, sensitive materials or specific tools requiring uniform protection throughout their structure.

Reliable protection for transport and storage

Designed for professional use, this **waterproof transport case** provides effective protection against external aggressions such as humidity, dust and impact. It preserves the integrity of your equipment, whether on the move or in prolonged storage.

Why choose a waterproof case for sensitive equipment?

Waterproofing guarantees **enhanced protection** against unpredictable external conditions, particularly during field operations or frequent transport.

A solution for professional use in the field

The **Peli 1740 case** meets the needs of professionals working in demanding environments. It fits perfectly into industrial, logistical or technical contexts where equipment safety is a priority.

When should you use this professional carrying case?

Particularly suited to **outdoor operations**, regular travel or secure storage of equipment requiring reliable protection.

Easy handling despite bulky size

Despite its size, this **case for bulky equipment** is designed for use in the field. It enables bulky equipment to be

transported more smoothly, while maintaining a high level of safety.

Is the Peli 1740 suitable for frequent travel?

Yes, it's ideal for professionals who need to **move long equipment on a regular basis**, while ensuring constant protection.
