Manikin care Susie and Simon

S200 Susie Simon® Patient Care Simulator

The S200 Susie Simon® Patient Care Simulator is an advanced medical training mannequin designed for teaching nursing and clinical procedures. It enables healthcare professionals and students to practice a wide

range of essential procedures, such as IV training, tracheal care, catheter placement, administration of enemas, nasogastric feeding and much more. Its realistic design and advanced features make it an essential tool for immersive, effective training.

Features:

The S200 Susie Simon® features a fully articulated body with soft, natural skin on the face, hands, feet and fingers. It enables training in basic care techniques such as bathing and bandaging, faithfully reproducing the movements performed on a real patient.

Versatile training for multiple procedures

- General care: Practice wound care, administer enemas and nasogastric feeding.
- Catheterization and injections: Interchangeable genitalia for male and female catheterization training, plus intramuscular injection sites in the deltoids, quadriceps and superior gluteal region.
- Ophthalmic and ear care: mobile eyes for eye care practice and simulated ear canal for irrigation and drop administration.
- Respiratory and gynecological care training: Functional tracheostomy, realistic vagina and cervix for douching and cervical smears.

Ease of use and optimized storage

With its movable joints (head, jaw, elbows, wrists, ankles, knees) and waist-high folding structure, this medical simulator is both easy to handle and store. Its ergonomic design ensures smooth, intuitive operation during training sessions.

Benefits of the Susie Simon® S200 mannequin:

- Realistic simulation: immersive experience for caregivers, faithfully reproducing real-life care conditions.
- Versatility: Numerous features and accessories and interchangeable male/female genders to cover a wide spectrum of medical procedures.
- Ease of use and storage: Flexible, foldable design for easy storage and transport.
- Suitable for medical and nursing training: Ideal for schools, hospitals and training centers wishing to offer hands-on, immersive training.

Use:

The S200 Susie Simon® Patient Care Simulator is an essential tool for:

- Training nursing and medical students.
- Patient care training in hospitals and clinics.
- Simulation of medical and paramedical procedures.
- Advanced training for healthcare professionals wishing to improve their technical skills.

The S200 Susie Simon® Patient Care Simulator is an invaluable asset for medical education and training. Its realistic design, versatility and ease of use make it an essential tool for training centers and hospitals. Investing in this simulator means guaranteeing quality training for future healthcare professionals, and improving patient care.
