Handheld nozzle AKRON TurboJet 1704

Discover the Turbojet 1704 hand-held handheld nozzle from Akron Brass, state-of-the-art equipment designed for professional firefighters. Distributed in France by **MMF Protection et Sécurité**akron Brass, main dealer and authorized repair center, this handheld nozzle offers exceptional performance and versatility for a wide range of firefighting situations.

Turbojet 1704 technical specifications

The firefighting nozzle **TurboJet style 1704** is very similar to the 1702 model, but differs in 3 specific flow rates.

Features	Description
Adjustable flow rates	50, 90 or 115 L/min at 7 bar, for optimum adaptation to different work situations.
Jet type	Possibility of switching from a powerful straight jet to a diffuse fog jet, with a quarter-turn rotation, facilitating rapid adjustment of the jet pattern.
Construction materials	Extruded Pyrolite body and sleeve, for lightness and robustness, adapted to demanding conditions.
Maximum pressure	Withstands a maximum operating pressure of 16 bar, guaranteeing reliable performance even in high-pressure situations.
Pattern identification	Rubber bumper with raised lug for tactile jet pattern identification, ideal for operations with reduced visibility.

Turbojet 1704 benefits

- **Versatility**: Thanks to its adjustable flow rates, the Turbojet 1704 can be adapted to a variety of scenarios, from structure fires to vehicle fires.
- **Ease of use**: Intuitive transition between different jet patterns enables operators to react quickly to changing needs in the field.

- **Durability**: High-quality materials ensure long service life, even under intensive use.
- **Safety**: Ergonomic design and tactile identification features reduce the risk of error during critical interventions.

Recommended applications

- **Urban fires**: Adaptable flow rates and spray patterns for maximum efficiency in built-up environments.
- **Industrial fires**: Ability to handle high pressures and deliver high flow rates to control complex fires.
- **Interventions in confined environments**: Precise jet control to minimize collateral damage and maximize responder safety.

Why choose MMF Protection et Sécurité?

- **Recognized expertise**: Personalized advice to select the equipment best suited to your specific needs.
- **Dedicated after-sales service**: Maintenance and repairs carried out by certified technicians to guarantee the longevity of your equipment.
- **Spare parts availability**: Quick access to essential components to minimize equipment downtime.
