

Handheld nozzle AKRON TurboJet 1704

Discover the Turbojet 1704 hand-held handheld nozzle from Akron Brass, state-of-the-art equipment designed for professional firefighters. Distributed in France by MMF Protection et Sécuritéakron Brass, main dealer and authorized repair center, this handheld nozzle offers exceptional performance and versatility for a wide range of firefighting situations.

Turbojet 1704 technical specifications

The firefighting nozzle TurboJet style 1704 is very similar to the [1702 model](#), but differs in 3 specific flow rates.

Features	Description
<i>Adjustable flow rates</i>	50, 90 or 115 L/min at 7 bar, for optimum adaptation to different work situations.
<i>Jet type</i>	Possibility of switching from a powerful straight jet to a diffuse fog jet, with a quarter-turn rotation, facilitating rapid adjustment of the jet pattern.
<i>Construction materials</i>	Extruded Pyrolite body and sleeve, for lightness and robustness, adapted to demanding conditions.
<i>Maximum pressure</i>	Withstands a maximum operating pressure of 16 bar, guaranteeing reliable performance even in high-pressure situations.
<i>Pattern identification</i>	Rubber bumper with raised lug for tactile jet pattern identification, ideal for operations with reduced visibility.

Turbojet 1704 benefits

- **Versatility:** Thanks to its adjustable flow rates, the Turbojet 1704 can be adapted to a variety of scenarios, from structure fires to vehicle fires.
- **Ease of use:** Intuitive transition between different jet patterns enables operators to react quickly to changing needs in the field.

- **Durability:** High-quality materials ensure long service life, even under intensive use.
- **Safety:** Ergonomic design and tactile identification features reduce the risk of error during critical interventions.

Recommended applications

- **Urban fires:** Adaptable flow rates and spray patterns for maximum efficiency in built-up environments.
- **Industrial fires:** Ability to handle high pressures and deliver high flow rates to control complex fires.
- **Interventions in confined environments:** Precise jet control to minimize collateral damage and maximize responder safety.

Why choose MMF Protection et Sécurité?

- **Recognized expertise:** Personalized advice to select the equipment best suited to your specific needs.
- **Dedicated after-sales service:** Maintenance and repairs carried out by certified technicians to guarantee the longevity of your equipment.
- **Spare parts availability:** Quick access to essential components to minimize equipment downtime.
