

Handheld nozzle AKRON Assault 4863

Discover the Assault 4863 hand lance from Akron Brass, a versatile and robust solution designed for fire-fighting professionals. In France, **MMF Protection et Sécurité** is your main dealer and authorized repair center, offering recognized expertise and dedicated after-sales service.

Assault 4863 technical specifications

Features	Description
<i>Spray performance</i>	Ensures optimum jet quality at pressures as low as 3.5 bar, offering enhanced efficiency during interventions.
<i>Durable design</i>	Simple, robust, low-maintenance structure guarantees exceptional longevity and reliability.
<i>Ease of use</i>	Easy transition from straight to diffused jet thanks to quarter-turn rotation, simplifying field operations.
<i>Tactile identification</i>	Raised markings to identify the straight jet, facilitating use in low-visibility conditions.
<i>Ergonomic handle</i>	Equipped with a pistol-grip handle and rotating teeth, ensuring a comfortable grip and improved performance.

Assault 4863 lance benefits

- **Operational versatility:** Adapted to a variety of pressures and flow rates, the 4863 lance meets the diverse needs of fire-fighting operations.
- **Easy training:** Thanks to its intuitive design, team training is simplified, enabling fast, efficient implementation.
- **Reduced maintenance:** The lance's durable structure minimizes maintenance requirements, ensuring constant equipment availability.
- **Increased efficiency:** Design features such as easy transition between jet types and tactile identification improve efficiency in the field.

Recommended applications

The **Assault 4863 lance** is particularly suitable for :

- **Industrial fires:** Its ability to operate efficiently at low pressure makes it ideal for complex industrial environments.
- **Urban response:** Versatile flow rates and easy handling make it a valuable tool for municipal fire departments.
- **Low-visibility situations:** Tactile markers enable effective use even in low-light or dense smoke conditions.
