

Handheld nozzle AKRON ProVenger 1602

ProVenger 1602: the brand's versatile handheld handheld nozzle AKRON®

The handheld nozzle **ProVenger 1602**, designed by **Akron Brass** and distributed in France by **MMF Protection et Sécurité** is the benchmark in fire-fighting equipment. Combining **versatility, robustness and performance**, it meets the requirements of professionals for a wide range of applications, from urban fires to industrial and forest fires.

With its many variations and customization options, the ProVenger 1602 is an essential choice for teams seeking reliability and efficiency.

Why choose handheld nozzle ProVenger 1602?

The handheld nozzle ProVenger 1602 stands out for its technical features and practical benefits:

- **Adjustable flow rates:** choose between 20, 40, 80 or 160 L/min for optimum adaptation to your needs.
- **Jet types:** switch from a powerful straight jet to a fog covering up to 100° thanks to rotating turbine teeth.
- **Robust materials:** body in Pyrolite, a light, resistant alloy, with a reinforced nylon bumper.
- **Safety standards:** NFPA 1964 certified, guaranteeing optimum reliability.
- **Ergonomic design:** lightweight, handy and easy to use, even in extreme situations.

Versions available

The **ProVenger 1602** is available in several versions to meet all professional requirements:

- With or without **pistol grip**, for a better grip.
- **Adjustable flow rates**: 20, 40, 80 or 160 L/min according to your needs.
- Compatible with various **fittings** (BSP or Storz).

Applications and benefits

Thanks to its technical features and versatility, the ProVenger 1602 is ideal for :

- **Forest fires**: low flow rate to save water and dense fog for safe intervention.
- **Urban fires**: powerful straight jet for maximum range and adjustable flow rate.
- **Industrial fires**: efficient fog jet for cooling flammable gases.
