

Firefighting monitor AKRON StreamMaster II 3480

Monitor AKRON® StreamMaster II 3480: maximum performance and safety with MMF

The monitor AKRON® StreamMaster II 3480, distributed exclusively in France by **MMF Protection et Sécurité** is a state-of-the-art piece of fire-fighting equipment. This monitor electric fire-fighting water pump delivers an impressive **7600 liters per minute**, combined with advanced features and simplified installation, ideal for demanding professionals.

Why choose monitor AKRON® StreamMaster II 3480?

This water monitor is part of the brand's renowned StreamMaster™ II range **AKRON®**. Designed to meet the needs of **fire departments, petrochemical industries, offshore platforms and safety equipment manufacturers**, it offers:

- **Powerful flow:** 7600 l/min for fast, efficient fire suppression.
- **Robust construction:** made from Pyrolite, a material that is both light and resistant.
- **Advanced features:** absolute position sensors for obstacle avoidance, programmable oscillation and storage positions.
- **Easy installation:** plug-and-play system with integrated wireless compatibility.
- **Versatility:** 355° rotation and elevation from +120° to -45°, for extensive coverage.
- **Precise control:** integrated CAN system, with software updates via USB.

Technical specifications

	7600 l/min
	Pyrolite
	355°
	+120° à -45°

Power supply	12V or 24V
Control system	Integrated CAN
Features	Programmable oscillation, obstacle avoidance

Applications and benefits

The monitor AKRON® StreamMaster II 3480 is ideally suited to the needs of :

- **Municipal fire departments:** fire management in complex environments.
- **Petrochemical industries:** securing sensitive installations with remote control.
- **Offshore platforms:** rapid fire suppression in high-risk environments.
- **Military applications:** robust solution for extreme conditions.
- **Equipment manufacturers:** integration into complete systems for optimum fire management.
