

Elevating mechanism - monitor StreamMaster II (3480-3482)

Optimize the performance of your firefighting monitor AKRON Stream Master II (3480-3482) with a reliable and robust elevation mechanism. Designed to guarantee maximum precision in jet orientation, this essential component ensures smooth maneuverability and rapid response to emergency interventions.

An elevation mechanism designed for efficiency

The **Stream Master II** 's elevation mechanism has been designed to meet the requirements of fire-fighting professionals:

- **Precise movement:** Allows controlled elevation for optimum coverage.
- **Robust construction:** Materials resistant to corrosion and extreme conditions.
- **Perfect compatibility:** Designed to integrate seamlessly with models **3480 and 3482**.
- **Increased reliability:** Reduced wear thanks to optimized gear system.

MMF Protection et Sécurité your AKRON authorized partner

As an **AKRON main dealer and authorized repair center** in France, we guarantee :

- **Technical expertise** to advise you on installation and maintenance.
- **Genuine parts** to ensure the compatibility and longevity of your equipment.
- **A fast, efficient repair service** should the need arise.

Lift mechanism features

Features	Description
Compatibility	Monitor Stream Master II 3480 & 3482
Movement	+120° to -45° elevation
Material	High-strength aluminum alloy
