

Gears: rotation mechanism for monitor Stream Master II (3480-3482)

Optimize the rotation and precision of your firefighting monitor Stream Master II (3480-3482) with this replacement gear set. Designed to ensure smooth operation and efficient power transmission, this kit restores the original performance of the rotation mechanism.

A gear set designed for performance

Over time, gear wear can lead to malfunctions in the rotation of your firefighting monitor. This set of parts provides an effective, long-lasting repair. It includes :

- **Transmission gears:** guarantee smooth, jolt-free rotation.
- **Reinforced bearings:** ensure longer life and reduce premature wear.
- **Axles and fasteners:** for secure, precise assembly.
- **High-performance lubricants:** optimize mechanism operation.

Why trust MMF Protection et Sécurité?

As **AKRON's main dealer and authorized repair center** in France, we guarantee :

- **Genuine AKRON parts:** certified compatibility and quality.
- **Expert technical support:** installation and maintenance assistance.
- **Availability and responsiveness:** customer service at your disposal for any questions you may have.
