

Maintenance/repair kit - monitor StreamMaster II (3480-3482)

Maintenance and repair kit for monitor AKRON StreamMaster II

Extend the life and maintain the outstanding performance of your monitor **AKRON StreamMaster II** (models 3480 and 3482, with or without handwheel option) with our **maintenance and repair kit**. Designed specifically to meet the requirements of fire-fighting professionals, this kit includes a complete set of essential components, including O-rings, bearing balls, and much more.

The benefits of a complete maintenance kit

The **monitor AKRON StreamMaster II** is renowned for its rugged build quality and outstanding reliability. However, heavy use can lead to wear and tear on key components. With our maintenance kit, you benefit from a practical solution to keep your equipment in perfect working order.

- **Increased reliability:** High-quality components guarantee continuous performance.
- **Reduced costs:** Repair rather than replace, saving on unnecessary expenses.
- **Perfect compatibility:** Parts designed specifically for models 3480 and 3482, with or without handwheel.
- **Ease of use:** Each kit is complete and ready to use, for rapid intervention.

A kit designed for professionals

The kit includes everything you need to maintain your monitor fire hydrant. O-rings ensure a perfect seal, while balls and gaskets guarantee optimum fluidity of movement. Specific parts for models with handwheel offer complete support for your equipment.

Kit technical data

	Provide hydraulic seal
	Fluidize rotary motion
	Protect against bearing wear

<i>Specific parts for handwheels</i>	Adapted to equipped models
<i>Wrenches and accessories</i>	Facilitate on-site repairs
