

Gears: lifting mechanism for monitor Stream Master II (3480-3482)

Optimize the performance of your firefighting monitor **AKRON Stream Master II (3480-3482)** with our elevator gear kit. Designed to ensure precise, reliable operation, this kit guarantees optimum transmission of motion and longer system life.

An essential repair and maintenance kit

Over time and with intensive use, the elevation mechanism of your monitor may suffer wear and tear, impacting its responsiveness and smoothness. This set of original **AKRON** gears will :

- **Restore the precision** of up and down movements.
- **Eliminate mechanical backlash** that can affect jet orientation.
- **Extend the life** of your fire-fighting equipment.
- **Guarantee perfect compatibility** with **Stream Master II 3480 and 3482** models.

MMF Protection et Sécurité your **AKRON** expert in France

As an **AKRON** main dealer and authorized repair center, we provide you with :

- **100% genuine parts**, conforming to the manufacturer's requirements.
- **Technical support** to guide you through the replacement process.
- **Recognized expertise** in firefighting monitors maintenance and repair.
