

AKRON 6047 wireless remote control

The **AKRON® 6047 wireless remote control** is essential equipment for fire-fighting professionals wishing to optimize control of their motorized firefighting monitors. Thanks to its advanced technology, it enables smooth, precise remote management, guaranteeing rapid, effective intervention in critical situations. Designed for rugged robustness, it is the ideal choice for fire departments, high-risk industries and fire safety services.

Optimum control for effective intervention

During a fire-fighting operation, every second counts. The AKRON® 6047 remote control offers **intuitive, responsive operation**, enabling operators to control their equipment remotely with great precision. Key features:

- **Advanced ergonomics:** Designed for a comfortable grip, with overmolded rubber handles and large buttons suitable for gloved hands.
- **Optimized modularity :** Customizable features, such as LED brightness and monitor speed, accessible via a web interface.
- **Intuitive, easy-to-read controls:** simplified interface for quick access to essential functions, with luminous display for day and night use, and display of monitor and valve position (on barrels with position feedback).
- **Increased responsiveness:** Instantaneous transmission of commands for reduced response time, with intuitive controls and one-finger joystick.
- **Extreme resistance:** designed to withstand hostile environments, shocks and water splashes.

Cutting-edge technology for professionals

The AKRON® 6047 wireless remote control features reliable communication technology, guaranteeing efficient transmission of commands in the field. With a **range of up to 100 meters**, it can be used to control motorized firefighting monitors even from a distance, offering greater safety for operators. Its standard operating frequency of **2.4 GHz** ensures stable connectivity, minimizing the risk of interference.

Compatibility and versatility

Designed for use with a wide range of **firefighting monitors motorized guns** **AKRON®, the 6047 remote control is an indispensable tool for intervention teams. It enables 2 guns to be controlled in parallel, with**

their respective parameters and settings: switching from one to the other is very simple, and each monitor can be identified by a specific color code.

The 6047 remote control is compatible with :

- **StreamMaster II 3482** - Monitor programmable with automatic oscillation.
- **MercuryMaster 3446** - Monitor portable compact and powerful.
- **HydroMaster 3567** - Monitor high pressure designed for industrial applications.

This compatibility makes it a versatile solution for a wide range of applications, from **emergency vehicles** to **fixed systems** and industrial installations.

Technical specifications

Features	Description
<i>Range</i>	Up to 100 meters
<i>Power supply / operating time</i>	2 rechargeable lithium-ion batteries, type 26650, for 24 hours of continuous use
<i>Communication frequency</i>	Standard 2.4 GHz (900 MHz possible), minimizing interference
<i>Protection class</i>	IP66 (protected against strong water splashes and totally dustproof)
<i>Compatibility</i>	Firefighting monitors motorized AKRON®

Designed for demanding environments

The AKRON® 6047 remote control has been developed to operate in extreme conditions. Its robust, **IP66-compliant** casing guarantees **protection against water, dust and shocks**, making it ideal for use in outdoor or industrial environments.

A reliable solution, available from MMF Protection et Sécurité

As an **authorized reseller and repair center AKRON®**, **MMF Protection et Sécurité** offers you this remote control with personalized support. Our team of experts is at your disposal to :

- **Advise you** on the best configuration for your needs.
- **Provide after-sales service** and maintenance for your equipment.
- **Provide technical support** when you need it.
