

DSP and AR reduction fittings with aluminium locks

DSP and AR reduction fitting with aluminum locks

The **symmetrical D.S.P and A.R NF S 61-701-PN25** fitting is a high-quality fitting designed for plumbing and safety systems. It is a **DSP (Straight Welded and Pressed)** and **AR (Shrunk Aluminium) reduction fitting**, complying with **NF S 61-701** and **PN25** standards. This product is fitted with aluminum locks, guaranteeing exceptional resistance to harsh conditions and optimal sealing. Ideal for installations requiring enhanced robustness and reliability.

Features :

- **Standard:** Complies with NF S 61-701, guaranteeing reliable, long-lasting use.
- **Pressure rating:** PN25, for applications requiring high pressure resistance.
- **Materials:** **High-quality aluminum** construction, offering lightness and strength.
- **Dimensions:** Available in various sizes to suit different installation requirements.
- **Aluminum locks:** Practical, reliable locking system for enhanced security.
- **Application:** Primarily used for plumbing and industrial safety installations.

Advantages of DSP and AR reduction fittings with aluminum locks:

- **Reliability and robustness:** The aluminum material ensures excellent resistance to corrosion and weathering.
- **Standards compliance:** Compliance with NF S 61-701 standards guarantees a reliable, high-performance product.
- **Ease of installation:** The aluminum locking system simplifies assembly and installation.
- **Versatility:** Suitable for many types of plumbing and safety systems.
- **Durability:** Its design and material ensure long life, reducing maintenance costs.

Application:

This **symmetrical D.S.P and A.R NF S 61-701-PN25 fitting** is mainly used in industrial installations, plumbing networks and safety systems where pressure and durability are crucial. Thanks to its technical features, it is particularly suited to high-pressure applications and environments requiring wear-resistant equipment.

The **D.S.P and A.R NF S 61-701-PN25** fitting is an essential product for professionals looking for reliability, performance and safety. By choosing this fitting, you're opting for a product that complies with strict standards and is built to last.

MMF Protection et Sécurité offers you this quality product, and remains available to answer all your technical questions. Please do not hesitate to contact us for further information or for any specific request.
