### Advantages of the steel tripod for flares :

#### Sturdiness and safety for your equipment

Its 3-section structure ensures remarkable strength, guaranteeing optimum support for your equipment, even in demanding conditions.

#### Practical and easy to store

With a folded height of just 122 cm, this tripod is easy to transport and store, perfect for mobile operations.

#### Exceptional versatility

Compatible with a wide range of accessories thanks to its universal tip and various connectors, it adapts to numerous lighting configurations.

## **Stability on all terrains**

The double-braced spacer ensures maximum stability, even on uneven surfaces, for added safety.

## **High-quality manufacturing**

Designed in Italy to exacting manufacturing standards, this tripod is built to last and withstand the most demanding conditions.

## **Use:**

This tripod is ideal for lighting and photography professionals, as well as technicians working with illuminated balloons. Its great height and sturdiness make it an essential piece of equipment for optimal lighting installations.

When you opt for this chrome-finish steel tripod, you're choosing reliable, sturdy and versatile equipment, designed to meet the demands of professionals. Perfectly suited to the use of lighting balloons, it optimizes your lighting installations while guaranteeing maximum stability and safety.
