

## 5L SureSeal Drip Torch

### Sure Seal 5 L forest drip torch - Safety and performance for firefighters

The **Drip Torch** is an indispensable tool for **firefighters** and **forest fire** prevention professionals. Designed for prescribed burns and backfires, it enables safe, controlled ignition.

Made from lightweight, resistant aluminum, it features a non-return valve, a fuel trap and an automatic igniter that cuts off the fuel supply when the torch is in an upright position, thus reducing the risk of accidents. Its D.O.T.-approved tank guarantees safe transport of flammable fuels, and its ergonomic handle makes it easy to grip.

With its 4.5 L capacity and optimized filling system, the **Drip Torch** ensures long, efficient use in the field. A reliable, robust tool for **forest fire-fighting** and land management operations.

### Advantages of the Drip Torch prescribed fire torch

- **Optimum safety:** equipped with a non-return valve and fuel trap to prevent backfire.
- **Precise ignition control:** the **Drip Torch** igniter automatically cuts off the fuel supply in the vertical position.
- **Lightweight and robust:** made of durable aluminum, this **drip torch** is easy to transport and resistant to extreme conditions.
- **Safe transport:** D.O.T.-approved tank complies with transport standards for flammable liquids.
- **Improved ergonomics:** full-length handle for a comfortable grip and better control.
- **Large capacity: 5-liter** tank for extended use without frequent refilling.
- **Simplicity of use:** easy filling thanks to a secure closing system and optimized design.
- **Suitable for prescribed burning:** ideal for **forest fire** prevention and backfire operations.
- **Versatile:** can be used for maintenance of natural areas, agricultural work and **fire-fighting**.

### Applications for the Drip Torch backfire torch

- **Fire-fighting:** used by **fire-fighters** for backfighting operations and prescribed burns.
- **Forest fire prevention:** used to create firebreaks to limit the spread of fires.

- **Management of natural areas:** the **Drip Torch** is used by forestry services to maintain and regenerate ecosystems.
- **Agriculture and forestry:** helps remove plant debris and prepare soil for cultivation.
- **Grounds maintenance:** this **ignition torch** can be useful for farmers, owners of large areas and forest managers.
- **Roadworks and infrastructure:** used for thermal weeding and road or path maintenance.
