Intervention rope ladder

Safety ladder rope.

This safety ladder rope is specially designed to meet the needs of difficult access in industrial or leisure environments. Made from top-quality materials, it ensures robustness, optimum safety and long service life. It features braided polyester ropes and a wooden rung system, offering a reliable solution for evacuation, safety and adventure parks.

Technical specifications:

Rope :

- Material: Braided polyester with central core.
- Diameter: 14 mm.
- Resistance: 2500 DaN (decanewtons).

Balusters :

- Material: Ash wood.
- Diameter: 31 mm.
- Length: 40 cm.
- Spacing between bar: 33 cm.

Fastening system:

- Lower end: The two ropes are connected by a seam sewn under heat-shrink tubing.
- Upper end: Each rope has a heat-shrunk sewn loop with metal ring or mountain carabiner.

Dimensions and weight:

- The first rung is 60 cm from the loop.
- Weight per metre of ladder: approx. 1 kg.

Construction:

The rungs are integrated into the rope during braiding, offering excellent resistance to tearing.

Advantages of safety ladder rope :

High strength: Braided polyester rope with a strength of 2500 DaN guarantees unfailing robustness, even in extreme conditions.

Secure attachment: Sewn-in loops and heat-shrink tubing ensure a solid, secure hold, whether with metal rings or mountain carabiners.

Flexibility of use: The ladder is available in 9 different lengths to suit a variety of specific applications.

Robust construction: Ash wood rungs are solidly integrated into the rope, offering excellent resistance to wear and tear.

Versatility: Ideal for industrial environments and leisure parks, it's perfect for evacuation, rescue or difficult-access systems.

Application:

Industrial environments: This ladder is ideal for installations where access is difficult, whether for evacuation, rescue or security systems.

Leisure and adventure parks: Perfect for adventure courses, climbing areas or high play structures.

Safety systems: Thanks to its sturdiness and secure fastening system, it is a major asset in rescue systems or emergency response.

Safety ladder rope is a must-have product for demanding environments. With its quality design, high strength and flexibility, it is the perfect answer to safety needs in industrial sectors, as well as in leisure facilities. Offering excellent value for money, this ladder is a trusted choice for any situation requiring a difficult access or safe rescue solution.
