

Steel wrench DN 20 to 65

Product features:

Accessory type: Key

Reference: 20723

EAN13: -

The **DN 20 to 65 steel pipe wrench** is a high-performance tool designed for building and plumbing professionals. This sturdy model is ideal for assembly, disassembly and maintenance work on plumbing installations, including pipes and fittings. With its ability to adapt to a wide range of pipe diameters, this wrench is ideal for work on water and gas systems.

Made from **high-quality steel**, it offers optimum strength and long service life, even under demanding working conditions. Easy to use, it features a jaw system for precise, secure clamping, guaranteeing outstanding performance with every use.

Features :

- **Type:** Knitting wrench
- **Material:** High-strength steel
- **Diameter range:** DN 20 to 65
- **Length:** Suitable for professional use (specific dimensions available)
- **Weight:** Lightweight and easy to handle
- **Design:** Ergonomic with non-slip grip
- **Standards:** Complies with professional safety and quality standards
- **Application:** Suitable for plumbing installations and other mechanical work

Advantages of the DN 20 to 65 steel wrench :

- **High resistance:** Thanks to its high-quality steel construction, this wrench withstands wear and severe stress on construction sites.
- **Versatility:** It adapts easily to pipes of different diameters (DN 20 to 65), enabling flexible use on many types of installation.
- **Ergonomics:** Its ergonomic design ensures comfort of use, reducing fatigue during long work sessions.
- **Precision:** Jaws ensure optimum clamping, guaranteeing maximum safety when handling pipes.
- **Durability:** Designed to last the test of time, this tricoise wrench is ideal for intensive use, whether in maintenance work or construction projects.

Application:

The DN 20 to 65 steel tricoise wrench is indispensable for plumbing and maintenance professionals. It enables you to:

- **Ensure safe assembly of** pipes in water or gas installations.
- **Repair** plumbing fittings quickly and efficiently.
- **Dismantle pipe components** without risk of damage, thanks to its adjustable clamping system.

This tool is also essential for plumbers, heating engineers and other craftsmen working in the construction or industrial plant sectors.

The **DN 20 to 65 steel wrench** is the perfect tool for professionals looking for a reliable, durable and versatile instrument. Its high-strength steel, wide diameter range and ergonomic design make it a wise choice for any technical intervention on pipes. Investing in this pipe wrench will guarantee a professional finish to your work, while increasing productivity and safety on your worksites.
