

SUPER-PASS II beacon with heat sensor

SUPER-PASS II N°2 distress beacon with heat detector

The MMF distress beacon, also known as the dead man's beacon, is a state-of-the-art safety device designed to protect isolated workers and professionals working in high-risk environments. Compact and robust, it provides an audible and visual alert in the event of prolonged immobility or manual activation. Certified to ATEX standards, it guarantees optimum safety, even in the most demanding environments.

Features :

Alarm power: 98 dB at 3 meters, crescendo for enhanced hazard perception.

Signal light: flashing LEDs with color change for rapid identification.

Activation modes:

- Automatic after 30-35 seconds of immobility.
- Manual via alarm button.
- Autonomy: Up to 300 hours.

Ergonomic design:

- Sturdy clip.
- Identification window for number, photo and barcode.
- Control key for maintenance.

Resistance:

- Waterproof and ATEX-compliant.
- Operates between 10° and 25°C.
- Dimensions: 5.30 x 8.10 x 4 cm.

- Weight: 200 g with 9V battery.
- Maintenance: Simple cleaning with damp cloth and battery replacement every 6 months.
- Versions available: With or without heat detector.

Advantages of the Super-Pass II beacon :

- **Increased safety:** An audible and visual alarm for rapid location in the event of danger.
- **Easy to use:** A single button triggers or cancels the alarm.
- **Long autonomy:** Operates for up to 300 hours for long-lasting protection.
- **Rugged and reliable:** Designed for extreme environments, with ATEX certification.
- **Adaptability:** Available in standard or heat-sensor versions.

Application:

The MMF distress beacon is an indispensable tool for lone workers, firefighters, maintenance personnel and anyone working in high-risk environments. In the event of a fall, immobilization or critical situation, it enables emergency services to react quickly, reducing response times and increasing the chances of rescue.

Compact, high-performance and compliant with the most stringent safety standards, the MMF distress beacon is the ideal solution for protecting professionals exposed to hazardous conditions. Its powerful audible alarm and advanced light signal make it an essential device for ensuring rapid intervention in the event of an emergency.

Warranty: 1 year

Certifications: European standards EEX ib IIc T4 - Referenced in the Guide national des A.R.I.

Opt for safety with the MMF distress beacon, the benchmark in personal protection!
