

Mounting tripod for firefighting monitor (without tap)

Heavy mounting tripods for fire cannons and hoses

MMF Protection & Sécurité 's **heavy-duty tripods** are designed for the **safe, fixed installation** of fire cannons and hoses. Designed for on-site use, they guarantee optimum hold even under high pressure and demanding conditions.

Sturdy, high-performance tripods

Manufactured from high-grade materials, these tripods ensure **durable mounting** and **resistance to extreme environments**. Their design guarantees perfect stability, eliminating the risk of shifting or tipping during use.

Available configurations

These tripods are available in several versions to suit different flange standards:

- Inlet DN100-ASA150 / Outlet DN100-ASA150
- Inlet DN80-ASA150 / Outlet DN80-ASA150
- Inlet DN100-PN16 / Outlet DN100-PN16
- Inlet DN100-PN16 / Outlet DN100-ASA150

This diversity enables simple, effective integration with a wide range of fire-fighting equipment.

Ideal for fixed installations

Unlike mobile tripods, these models are designed for **permanent installation** on site. They are ideal for industrial infrastructures and sensitive areas requiring enhanced fire protection.

Heavy-duty tripod applications

This equipment is particularly suitable for :

- Industrial sites and petrochemical complexes

- Sensitive areas and critical infrastructures
- Installations requiring fixed, durable mounting of fire cannons and hoses

With their robust, reliable design, these tripods guarantee effective, continuous fire protection.

Why choose MMF Protection & Security?

With over 60 years of expertise, **MMF Protection et Sécurité** is a major player in fire protection. Our selection of equipment meets the requirements of professionals and guarantees performance, reliability and compliance with current standards.
