

RIA Robinet Incendie Armé rotating pivotant

Pivoting and Rotating RIA for Fire Safety - Equip Your Company with the Best Equipment

Pivoting and rotating fire protection valves (RPVs) are essential for effective fire protection in industrial, commercial and public environments. Designed for rapid, safe intervention, they enable first-response teams to act effectively when fires break out.

Why choose a pivoting or rotating RIA?

- **Maneuverability and flexibility:** Thanks to their pivoting structure, these RIAs offer great freedom of movement, making them easy to use in an emergency.
- Rapid deployment:** The rotating reel enables immediate commissioning, guaranteeing effective intervention from the very first seconds.
- Robust and compliant:** Manufactured to current standards (EN 671-1), our RIAs are tested and approved for maximum safety.
- Adaptability:** Available in a range of pipe lengths and diameters, they can be adapted to suit all needs and infrastructures.
- **Construction:** Made of steel tube and sheet with polyester epoxy resin coating. DMA composite diffuser valve.

RIA models for all environments

Our **pivoting and rotating fire extinguishers** are designed for installation in a variety of environments:

- . **Industries and factories:** for effective coverage of large spaces.
- . **Public buildings:** Hospitals, schools, hotels, shopping centers..
- . **Warehouses and storage areas:** For rapid response to fire hazards.
- . **Offices and commercial buildings:** Secure your workspaces with reliable, durable equipment.

Dimensions of our different Fire Fighter Valves

Item code	20129	20130	32683	32684
Nominal diameter	25 mm	25 mm	33 mm	33 mm

Pipe length	20 m	30 m	20 m	30 m
Dimensions in mm :				
Height A	640	640	655	655
Width B	680	680	705	705
Depth C	300	300	430	430
Connection D	1 "F	1 "F	1"1/2 M	1"1/2 M
Effective range (meters) at 0.2 Mpa to stopcock	Straight jet 10 m / Diffused jet 3 m			
Empty weight	22 kg	27 kg	30 kg	38 kg
N.F EN 671-1 certification	RC/02/001	RC/02/001	RC/02/003	RC/02/003

Installation and maintenance of pivoting and rotating RIAs

The installation of an RIA must be carried out by a professional to ensure its compliance and effectiveness in the event of fire. In addition, regular maintenance is necessary to ensure proper operation and extend the system's service life.

Our services: We can offer you a preventive and corrective maintenance service to ensure the longevity and performance of your fire equipment.

Need a pivoting or rotating RIA? Discover our complete range on our online store mmf.fr and equip yourself with the best equipment for optimum safety!
