Armed fire valve cabinet fire hose reel

The AS200 " fire hose reel " cabinet is designed to protect and store a **fire hydrant (fire hose reel)**. Sturdy and functional, it allows firefighting equipment to be housed in a dedicated metal cabinet while protecting it when not in use.

Made of **steel** and coated with **red RAL 3000** epoxy-polyester paint, the AS200 cabinet is intended for professional installations requiring the protection of a fire hose reel. It is available in several configurations: **with or without a back panel**, and **either fully assembled or delivered as a kit** for a more economical solution.

fire hose reel What is a fire hydrant cabinet used for?

A fire hydrant **cabinet** protects **a fire hose reel** and clearly marks its location. It provides a protective enclosure around the firefighting equipment while allowing access when needed.

The AS200 cabinet is specifically designed to **protect fire hose reel**. Its dimensions of 800 × 970 × 500 mm allow it to accommodate compatible swiveling, rotating fire hose reel.

AS200 Cabinet Compatible with Swiveling and Rotating Fire Extinguishers fire hose reel

fire hose reel The AS200 fire cabinet is designed to house **any swivel-and-rotating fire hydrant.** It thus protects the entire unit within a metal enclosure while maintaining an installation suitable for the operation of the fire fire hose reel.

This compatibility makes it a suitable solution for various configurations of fire hydrants when the installation requires a dedicated protective cabinet.

Available with or without a back panel

To accommodate the installation’s mounting constraints,**the AS200 “ fire hose reel ” cabinet is available with or without a back panel**.

- **AS200 with back panel:** cabinet equipped with a back panel for a fully enclosed configuration;
- **AS200 without a back panel:** a configuration designed for installations that do not require a back panel.

Choosing between an **fire hose reel cabinet with or without a back panel** allows the product to be adapted to the characteristics of the mounting surface and the configuration selected for installing the Armed Fire Hydrant.

fire hose reel Cabinet—pre-assembled or as a kit: two options available

The AS200 cabinet is also available in **two delivery formats** to meet the technical and economic requirements of professionals.

- **AS200 Cabinet (fully assembled):** delivered fully assembled to facilitate and speed up installation;
- **AS200 cabinet as a kit:** delivered unassembled; this cost-effective version reduces the purchase price while maintaining the cabinet's protective function.

The **self-assembly kit version** is particularly advantageous for projects requiring multiple cabinets fire hose reel or when budget is a key factor in equipment selection.

Sturdy steel construction

The AS200 features a **steel construction** designed to protect firefighting equipment. The entire unit is finished with a **red RAL 3000 epoxy-polyester paint**, a distinctive color that also allows for quick identification of firefighting equipment.

Its metal design protects the fire hose reel from common external stresses while keeping the equipment organized in a dedicated cabinet.

Door with Key Lock

The AS200 fire hyd fire hose reel t cabinet is equipped with a door featuring **a key lock**. This lock keeps the cabinet secure when the fire hyd t is not in use.

The technical data sheet also specifies that the fire hose reel must not be mounted on the cabinet's sheet metal back panel; **it must be mounted on a rigid partition**.

Technical Specifications of the AS200 " fire hose reel " Cabinet

- **Model:** AS200
- **Application:** Protection of a fire hydrant
- fire hose reel C**ompatibility:** any swiveling, rotating fire hydrant head
- **Construction:** steel
- **Finish:** Epoxy-polyester paint
- **Color:** red RAL 3000
- **Locking:** door with key lock;
- **External dimensions (H × W × D):** 800 × 970 × 500 mm
- **Weight:** 35 kg
- **Configurations:** with or without a back panel
- **Delivery:** fully assembled cabinet or economy version as a kit to be assembled

Dimensions of the AS200 cabinet

With exterior dimensions of **800 mm in height, 970 mm in width, and 500 mm in depth**, the AS200 provides the necessary space to accommodate a compatible swivel-rotating fire hose reel.

Its weight, as specified in the technical documentation, is **35 kg**. These specifications must be taken into account when preparing the mounting surface and installing the cabinet.

Important: Mounting the fire hose reel on a rigid partition

The technical documentation specifies an important point regarding installation: **the fire fire hose reel e must not be mounted on the sheet metal back panel of the AS200 cabinet**. The fire e must be mounted directly on a **suitable rigid partition**.

fire hose reelThe cabinet therefore serves to protect and enclose the fire hose reel, while the mechanical mounting of the fire hose reel must be secured to a sufficiently rigid support.

Advantages of the AS200 Fire Hydrant Cabinet (fire hose reel)

- Designed specifically to protect an Armed Fire Hydrant
- Compatible with any swiveling fire hydrant (fire hose reel)
- Sturdy steel construction
- Red RAL 3000 epoxy-polyester paint finish
- Door equipped with a key lock
- Available with or without a base
- Available fully assembled for easy installation
- Available as a self-assembly kit for a cost-effective solution
- External dimensions: 800 × 970 × 500 mm
- Solution designed for the protection and storage of a fire hose reel

How to Choose Your fire hose reel AS200 Cabinet?

The choice of**the AS200 fire hose reel cabinet** is based primarily on two criteria. First, select a version **with or without a back panel** depending on the installation configuration, then choose between a **fully assembled cabinet** and a **cabinet delivered as a kit to be assembled**.

The fully assembled version offers ease of installation, while the kit version is a cost-effective alternative, particularly suitable for equipping multiple installations.

MMF, a specialist in fire protection fire fire hose reel, and equipment

fire hose reel MMF offers professionals a range of equipment designed for the installation and protection of fire hydrants.The AS200 fire hydrant cabinet, available with or without a back panel and in either a fully assembled or DIY kit version, allows the fire fire hose reel 's protection to be tailored to the technical and economic constraints of each installation.
