

## Monitor nozzle AKRON Rampage 4461 BRONZE (FM approval)

**The Rampage MasterStream 4461 head from AKRON®** is a powerful, reliable solution for demanding fire-fighting operations. Made from **high-strength bronze**, it is designed to offer **exceptional durability** in particularly corrosive environments, including marine, industrial and oilfield environments. Compatible with several monitors fixed and portable firefighters from the AKRON® range, it can be adapted to the most specific operational requirements.

Available from **MMF Protection et Sécurité AKRON® in France**, this model benefits from personalized technical support and professional after-sales service.

### Why choose the Rampage MasterStream head AKRON®?

- **Bronze material:** excellent corrosion resistance, suitable for aggressive environments.
- **Adjustable spray pattern:** simple changeover between straight and diffused spray for rapid adaptation in emergency situations.
- **High hydraulic performance:** high flow rate for maximum spray range.
- **Compatible with monitors fixed and portable** models such as [Apollo PE 3419](#), [MercuryMaster 3446](#) and [StreamMaster II 3482](#).
- **Simplified maintenance:** optimized maintenance with access to our catalog [and spare parts](#) stock [AKRON®](#).

### Preferred fields of application

Thanks to its robust design and high flow rate, the Rampage MasterStream head is particularly recommended for the following applications:

- **High-risk industrial sites** (oil rigs, chemical plants, etc.)
- **Maritime infrastructures** (ports, ships, coastal areas)
- **Sensitive logistics buildings, hangars and warehouses**
- **Military and airport facilities**
