Operating key for DN 40 hydrant

Wrench for DN 40 hydrants - professional tool in cast iron

Wrench for DN 40 hydrants for fast, safe opening

This sturdy wrench is specially designed to operate sprinkler hydrants with a nominal diameter of 40 mm. It's ideal for use on urban sprinkler systems, in parks, gardens or public spaces.

Robust cast-iron design for maximum durability

Made from high-quality cast iron, this wrench is highly resistant to mechanical stress, wear and weathering. Its design guarantees a long service life, even under intensive use.

- Compatible with DN 40 outlets
- Tapered control square (typically 13x13 mm to 15x15 mm)
- High resistance to corrosion
- Easy to operate in the field

An essential tool for local authorities and maintenance professionals

Whether you're a road technician, municipal worker or green space maintenance manager, this wrench will enable you to open and close sprinkler outlets in complete safety. Its ergonomic design ensures a comfortable grip, even when wearing gloves or in wet weather.
