

Aluminum all-purpose wrench for fire hydrants

Product features:

Accessory type: Key

Reference: 20336

EAN13: -

Multifunction wrench for rapid intervention on fire hydrants

This all-purpose wrench is an indispensable tool for fire safety professionals and technical services. Designed to fit standard fire hydrants with 30 x 30 mm squares, it enables fast, efficient operation in all circumstances.

Lightweight, robust and efficient in use

Manufactured in aluminum, this wrench combines strength and lightness for optimum field use. Its ergonomic design makes it easy to handle, even in difficult or prolonged conditions.

Technical specifications :

- 30 mm female square (standard for fire hydrants)
- Anodized aluminum construction
- Approximate weight: 890 g
- Corrosion- and wear-resistant

- Comfortable grip, suitable for safety gloves

An indispensable tool for fire safety professionals

Ideal for road crews, firefighters or maintenance personnel, this all-purpose key gives you rapid access to essential fire hydrant components:

- Box opening
- Unlocking plugs
- Operating the feed valve

This key facilitates emergency interventions and guarantees optimum responsiveness when the hydrant is put into service.
