Stage spotlight star elss-sldc 14000 lumen 10 -32 v dc (ce + rohs) (supplied without power cable)

Scene Star Brow Mount LED floodlight - Akron Brass

The **Scene Star Brow Mount** is a high-performance LED spotlight designed by **Akron Brass**, renowned for its excellence in emergency lighting equipment. Designed specifically for **emergency response vehicles** (fire trucks, ambulances, mobile units), this stage floodlight attaches securely to the vehicle roof (brow mount) to provide optimum illumination in the most demanding conditions.

Thanks to its **advanced LED technology**, the SceneStar guarantees powerful, long-lasting and uniform light, ideal for securing and illuminating intervention areas, even in total darkness or low-visibility environments.

Features:

- Light output: up to 20,000 lumens for outstanding stage lighting.
- Power supply: available in AC (120V / 240V) or DC versions, to suit all vehicles.
- LED technology: 48 high-intensity LEDs with optimized thermal management.
- Combined optics: spot and flood beam for extensive, even light coverage.
- Mounting: roof-mounted, with options for pole, tripod or base portable.
- Solid-state electronics: constant performance, low power consumption.
- Warranty: 6-year guarantee of reliability and longevity.
- Construction: robust, resistant to weather and extreme operating conditions.

Advantages :

- Maximum power without overheating thanks to advanced heat dissipation.
- Low UV emission: limits insect attraction during night-time operations.
- Low maintenance: long LED life, no need for frequent replacement.
- Versatile use: several mounting options, for use on different types of vehicles or fixed installations.
- Enhanced safety: improved visibility at accident, fire or rescue scenes.
- **Application:**

The **Scene Star Brow Mount** is indispensable for **emergency services** and **response teams** operating in dark, dangerous or complex environments. It enables :

- effectively illuminate action zones to facilitate rescue, fire-fighting or emergency medical care operations;

- make the working environment safer, reducing risks to workers;
- optimize visibility of equipment and victims during night-time operations.

It is particularly suitable for :

- Fire engines
- Ambulances and medical rescue units
- Mobile command vehicles
- Temporary intervention or training sites

The**Akron Brass Scene Star Brow Mount** is much more than a spotlight: it's a genuine safety and performance tool for emergency professionals. Its power, durability and reliability make it an essential choice for all demanding emergency teams. When it comes to equipping your vehicles or mobile units, put your trust in Akron Brass expertise.
