

## Foldable crossing beam for DN 65 / DN 110 fire hoses

### Foldable crossing beam for DN 65 and DN 110 fire hoses

The foldable DN 65 and DN 110 fire-hose crossing device is an essential piece of safety equipment for work in high-risk areas. It is specially designed to protect fire hoses, electrical cables and air ducts from vehicles and pedestrians. Compact, robust and easy to deploy, it is ideal for professional environments requiring both rapid installation and maximum safety.

#### Technical specifications of the foldable crossing beam :

- **Model:** DN 65 and DN 110 crossing device - Foldable version
- **Available diameters:** Ø70 mm or Ø110 mm
- **Structure:** Foldable, for optimum space savings
- **Compatibility:** Fully compatible with traditional planks
- **Ergonomics:** Integrated carrying handle
- **Safety:** Retroreflective strips for enhanced visibility
- **Options:** Optional protective cover available for Ø70 mm models

#### Advantages :

- **Foldable and compact:** simplifies storage and saves space
- **Easy to transport:** Integrated ergonomic handle for better grip
- **Quick installation:** Immediate deployment in high-traffic areas
- **Increased safety:** Retroreflective strips ensure optimum visibility, even in low-light conditions
- **Modularity:** Compatible with existing traditional planks
- **Customizable:** Optional protective cover to enhance durability (Ø70 mm)

#### Application:

The DN 65 and DN 110 folding crossing plank is particularly suitable for :

- Rescue operations requiring rapid protection of fire hoses
- Construction sites with heavy traffic of machines and workers
- Temporary events with frequent passage of people or vehicles
- Industrial or urban areas where the safety of ground installations is crucial
- The passage of a light vehicle requires 2 elements, while that of a truck requires 4.

This device is a fast, reliable and durable solution for protecting your installations while ensuring the continuity of traffic.

The DN 65 and DN 110 folding crossing plank is the ideal solution for combining plant protection and user safety. Thanks to its compact size, ease of use and enhanced visibility, it meets the requirements of professionals looking for efficiency in the field.

**Order your DN 65 and DN 110 folding device now** to guarantee the safety and reliability of your on-site installations. The MMF team is at your disposal for any further information.
