

1"1/2 BSP female-female connector with gasket

1"1/2 BSP female-female connector with gasket

Scotty Firefighter **double female connectors** are designed for use in environments where safety and efficiency are paramount. Thanks to their construction in **high-quality engineering polymers**, these connectors guarantee long life and optimum performance. Their shape allows quick and easy connection between two pipes or equipment with compatible threads. These connectors are ideal for firefighters, industrial installations or any situation requiring a reliable connection under pressure. They are also suitable for a variety of **fire-fighting** applications and are compatible with current safety standards.

Features :

- **Material:** High-quality technical polymers.
- **Resistance:** Highly resistant to corrosion and extreme environmental conditions.
- **Lightweight:** Lightweight material design for easy handling.
- **Applications:** Suitable for industrial, fire-fighting environments, and other high-pressure systems requiring a reliable connection.

- **Dimensions:**

4085: 1 ½" NPSH x 1 ½" NPSH

4086: 1 ½" NPSH x 1 ½" NHT

4086AA: 1 ½" NHT x 1 ½" NHT

Benefits:

- **Exceptional durability:** Designed to resist wear, heat, chemicals and impact.
- **Ease of use:** Ergonomic, lightweight design makes connector installation and removal quick and easy.
- **Corrosion resistance:** The polymer material is rust-proof and weather-resistant, ensuring long-term reliability.

- **Versatility:** Compatible with several connection systems, allowing flexibility in use with different types of equipment and pipes.
- **Enhanced safety:** Precise, leak-tight connection ensures safe operation and prevents high-pressure leaks.

Application:

Double female connectors are mainly used in **fire-fighting** systems, where safe and efficient connections are needed to link different equipment, such as fire hoses, water tanks or pressure generators. They are also used in industrial environments for applications requiring **pressure-tight connections**. These connectors can be easily attached to 1 ½" diameter pipes with NPSH or NHT threads, depending on the model, ensuring compatibility with a wide range of systems.

Scotty Firefighter **double female connectors** are a high-performance, reliable connection solution for fire-fighting professionals and industrial applications. Their **durability, corrosion resistance** and **ease of use** make them the ideal choice for secure connections in tough working conditions. When you choose these connectors, you're investing in the long-term safety and performance you need for fast, efficient operations.
