

Firefighting monitor AKRON Omega XP 3528

Firefighting monitor AKRON Omega XP 3528 in bronze: robustness and performance

The firefighting monitor **AKRON Omega XP 3528** is a state-of-the-art piece of equipment designed for fire-fighting professionals. Manufactured in bronze and FM certified, this monitor offers exceptional durability and enhanced corrosion resistance, making it an ideal choice for demanding industrial and marine environments. **MMF Protection et Sécurité** is your authorized partner for this product, offering expertise and quality service. Its bronze construction ensures exceptional corrosion resistance, guaranteeing long life and consistent performance. This monitor is ideal for applications requiring high jet power and precise water distribution.

Technical specifications

Features	Description
<i>Construction material</i>	Made of bronze, ensuring superior resistance to the demanding conditions of firefighting.
<i>Maximum flow rate</i>	4800 LPM (1250 GPM) at a working pressure of 13.8 bar (200 PSI), enabling optimum adaptation to different intervention situations.
<i>Rotation</i>	360° horizontal movement and 135° vertical movement, offering great flexibility in the field.
<i>Certification</i>	FM (Factory Mutual) certified, guaranteeing compliance with the most stringent safety standards.
<i>Weight</i>	25 kg - designed to be compact and lightweight, making it easy to integrate on a variety of vehicles and installations.

Demanding applications

The monitor **Omega XP 3528** naturally finds its place in critical environments where performance and reliability are non-negotiable:

- **Petrochemical sites:** perimeter protection, storage tanks, containment vessels.
- **Ports and gas terminals:** adaptation to saline atmospheres and rapid action on large-scale fires.
- **Seveso-classified facilities:** compliant with the most stringent industrial safety requirements.

Advantages for professional use

The firefighting monitor **AKRON Omega XP 3528** offers several key advantages for professionals:

- **Reliability and durability:** designed to withstand the most demanding environments, it guarantees long life and consistent performance.
- **Versatility:** thanks to its flow settings and precise jet control, it adapts to a variety of work situations.
- **Operational efficiency:** its ability to bring fires under control quickly reduces risks to responders and minimizes property damage.
- **Ease of integration:** compatible with various fire-fighting systems, it integrates easily with existing equipment, optimizing available resources.

MMF Protection et Sécurité your trusted partner

As an authorized **AKRON** dealer, **MMF Protection et Sécurité** guarantees authentic, high-quality products. Here's what we offer:

1. **Expertise and personalized advice:** our team is trained to guide you in choosing the equipment best suited to your specific needs.
2. **Authorized repair center:** we maintain and repair your **AKRON** equipment, using genuine parts to guarantee its performance.
3. **Commitment to quality:** we are committed to providing quality service, with fast and reliable interventions, to extend the life of your equipment.

In a nutshell

The firefighting monitor **AKRON Omega XP 3528** is a wise investment for any fire safety professional. Its performance, durability and versatility make it an indispensable piece of equipment for efficient, safe interventions. At **MMF Protection et Sécurité** we are committed to providing you with the best service and products to ensure your safety and that of your teams.
