

Tactical torch PELI™ 7060 rechargeable

Peli™ 7060 rechargeable tactical flashlight - Professional power and reliability

The **Peli™ 7060 rechargeable tactical flashlight** was born of direct collaboration with the Los Angeles Police Department, guaranteeing a design tailored to the demands of professional interventions. This high-performance LED torch combines robustness, versatility and power, ideal for tactical missions as well as surveillance rounds. Its innovative double switch makes it easy to use in any situation. Compact and waterproof (IPX4 certification), the Peli™ 7060 offers intense light over a range of up to 210 meters, while ensuring long-lasting autonomy thanks to its rechargeable Lithium-ion battery.

Technical specifications

- **Light output:** up to 402 lumens, for ultra-powerful illumination
- **Range:** up to 210 meters
- **Length:** 22 cm, easy-to-carry pocket size
- **Lighting modes:** 4 modes programmable to suit your needs
- **Power supply:** rechargeable lithium-ion battery via included charging cradle
- **Runtime:** up to 57 hours in low-intensity mode
- **Double switch:**
 - Tactical end switch for quick access in emergency situations
 - Classic switch on the body for continuous use during rounds
- **Body:** shockproof for maximum resistance to knocks and drops
- **Lens:** anti-reflective tempered glass for optimum lighting quality
- **Waterproofing:** IPX4 certification - resistant to water splashes

Benefits

- **Base rechargeable:** eliminates the need for disposable batteries, for economical and ecological use
- **Customizable lighting modes:** modes can be programmed to suit your preferences and mission
- **Compact and rugged:** easy to transport yet designed to withstand the most extreme conditions
- **Versatile:** suitable for search and surveillance as well as tactical operations

- **Indispensable for professionals:** the Peli™ 7060 meets law enforcement standards, with an unlimited warranty

Use

The Peli™ 7060 lamp is designed for fast, efficient handling. In emergency response, activate the tactical switch at the end for immediate access to full light output. For patrols or search missions, use the main switch on the body of the lamp to navigate between programmable lighting modes, from low light to high power. Recharging is easy on the base, guaranteeing constant availability without interruption.

The **Peli™ 7060 rechargeable tactical flashlight** is an indispensable tool for demanding professionals, including law enforcement and security officers. Combining power, sturdiness and ease of use, it features an innovative dual switch and a cradle-mounted rechargeable battery, offering exceptional runtime. Thanks to its waterproof certification and shockproof body, it ensures optimum reliability in all circumstances. Invest in performance and durability with the Peli™ 7060, the benchmark tactical torch for critical interventions.
