

1L SureSeal Fuel Bottle Drip Torch

Sure-Seal Mini Drip Torch - Complete kit with 1 L (887 mL) fuel bottle

Turn a fuel bottle into a professional drip torch with the **Sure-Seal Fuel Bottle Drip Torch Kit**. Combined with the **fuel bottle for the mini drip torch kit (ref: 40826)**, this ultra-compact set is ideal for prescribed burning, forestry work or operations in difficult terrain.

Advantages and strengths

- **Ultra portable & lightweight:** The burner, stored in a sturdy PVC tube, slips easily into a backpack. Lightweight, it makes this kit easy to transport.
- **Quick to set up:** simply add around 60 ml of chain oil to a 0.89 L bottle of petrol, screw on the torch tip and light (partially unscrew the air valve, tilt, light: the flame follows your movement). This mechanism considerably reduces set-up time compared with traditional torches.
- **Adaptability to standard mixes:** Compatible with recommended oil/petrol or any other prescribed drip torch composition.
- **Optimum safety:** Adjustable aeration valve, precise flow control and flashback arrestor design.
- **Proven reliability:** Manufactured in the USA, torch tip made from durable materials, designed for professional use in directional fire, cylinder made from seamless aluminum, resistant to deformation under pressure, equipped with child-resistant cap and sturdy gaskets.
- **Easy maintenance:** spare parts available from **MMF Protection & Sécurité**.

Optional equipment available

- Spare wick
- Spare nozzle, corolla or extender
- O-ring kit and purge valve
- 0.59 L or 0.32 L fuel cylinders for extended autonomy

Preferred applications

- **Prescribed burning & forest management:** Quick to use and ideal for demarcation, slowing the progress of a fire or executing a backfire.

- **Brush clearing and edge maintenance:** for controlled burning of tall grass in sensitive areas or on slopes.
- **Difficult access:** Lightweight and compact, suitable for difficult access: slopes, undergrowth, steep areas.
- **Fire training:** Perfect for training managers, without cumbersome logistics.

MMF Protection & Safety expertise

As a recognized specialist in fire-fighting equipment, **MMF Protection & Sécurité** offers you reliable, field-proven products, and supports you every step of the way:

- Technical advice on purchasing
- Choice of model to suit your needs
- After-sales support and spare parts
- Fast shipment from stock in France

Usage & safety tips

1. **Respect the mixture:** gasoline + about 60 ml chain oil for regular combustion.
2. **Purge the valve:** open in ¼ turn and heat slowly to avoid flashback.
3. **Safety:** wear gloves, goggles and fireproof clothing. Always provide an emergency exit.
4. **Regular maintenance:** cleaning, replacement of worn parts to prevent any risk.

Kit contents

- 1 Sure-Seal torch tip with hose & integrated wick
- 1 0.887 L fuel bottle
- 1 rigid PVC transport tube

In short: a simple, safe and effective solution for light professional burning. Available now from **MMF Protection & Sécurité** with all the advice and parts you need for long-lasting use.
