

Black Out kit with Luccia flare and ENERGY case

Black Out Kit - Luccia lighting balloon + ENERGY 600 Wh case

Autonomous lighting solution for power cuts in professional environments

The **Black Out Kit** combines a **Luccia LED balloon, size S**, with an **ENERGY 600 Wh energy case**, to remain autonomous in the event of a power failure. It's a tried-and-tested solution for railway stations, industrial environments, public areas and security operations.

Kit technical specifications

- **Luccia luminous balloon size S:** 18,000 lumens, 360° illumination covering up to 700 m²
- **ENERGY 600 Wh case:** 220 V AC mobile station up to 600 W, silent operation and autonomy up to 12 h
- **Adjustable tripod:** height adjustable from 132 to 216 cm, ground stability included ballast bag

Recommended applications

This kit is ideal for :

- Ensuring reliable lighting during power cuts in railway stations
- Ensuring optimum vision in industrial zones or construction sites without electricity
- Maintaining emergency lighting in public areas (events, rescue services)

Advantages for professionals

- Total autonomy without the need for a generator or mains connection
- Quick installation and intuitive operation

- SNCF-approved performance for field operations
- Robust, mobile and silent solution, suitable for thousands of emergency situations

Why choose this Black Out Kit?

With its high-efficiency Luccia balloon and 600 Wh ENERGY case, this kit guarantees powerful, even lighting for up to 700 m² for almost 12 hours. It's an essential response to the needs of the rail, industrial and security sectors: a reliable, self-contained solution that meets the requirements of public areas.
