EAN13: -

Luccia self-contained lighting kit - Light balloon S + ENERGY case + tripod + ballast bag

This **complete Luccia kit** is designed to provide a mobile, powerful and totally autonomous lighting solution, perfectly suited to demanding environments such as railway worksites. **Referenced by the SNCF**, it meets the quality and performance standards required for interventions in the field.

Kit contents :

- **Luccia luminous balloon size S (ref. 39923)**

This compact balloon offers **high performance with a luminous flux of 18,000 lumens**. It provides **uniform 360° light covering up to 700 sq.m.**, ideal for outdoor worksites, even in difficult conditions.

- **ENERGY case - 1,460 Wh (ref. 39004)**

This battery allows you to use the balloon **autonomously for up to 12 hours** (or 6 hours with two

balloons). It features a **remaining autonomy display** and **two USB ports** for recharging your mobile devices on site. (Details available on page 12.)

- **Adjustable tripod for Luccia balloons (ref. 39962)**

Specially designed for Luccia balloons, this tripod offers great stability thanks to its **adjustable feet** which compensate for uneven ground. **Height adjustable from 132 to 216 cm.**

- **Ballast bag (ref. 35924)**

Fill with ballast to **ensure tripod stability**, even in windy conditions or on uneven ground.

Benefits :

- Complete autonomy without generator or mains connection
- Quick installation and intuitive operation
- Performance validated in railway field conditions
- Robust, mobile solution for construction, railway and event professionals

This kit is the ideal solution for all occasional lighting needs, outdoors or in non-electrified areas.

Order your Luccia kit today, a tried-and-tested solution used by the SNCF.
