Weighted signal cone for Skipper marker tape

Weighted traffic cone for Skipper™ - Non-slip base and high stability

This weighted traffic cone is specially designed to fit Skipper™ retractable marker modules. Featuring a wide, non-slip base stabilized by an integrated ballast, it guarantees excellent ground holding, even in outdoor environments or subject to moderate winds.

Full compatibility with Skipper™ accessories

The cone incorporates an ideal mounting system to accommodate Skipper™ modules and their accessories (retractable tapes, reels, support clips, etc.). Its diameter, height and design have been thought out to ensure perfect compatibility with the entire Skipper™ range.

Robust structure and optimum visibility

Made from resistant PVC, this traffic cone is designed for intensive use. It features high-visibility reflective strips for quick detection, even in low-light conditions. The structure is impact, heat and UV-resistant, for maximum durability.
