Foldable telescopic traffic cone

Foldable telescopic traffic cone - Safe and space-saving

This telescopic traffic cone is the ideal solution for temporary marking of hazardous or intervention areas. Folding flat and easy to transport, it deploys in seconds to guarantee effective, visible signage that complies with safety standards.

A compact, practical and lightweight folding cone

The great advantage of this model is its telescopic design: it folds completely into its rigid base, taking up minimal space. Perfect for maintenance professionals, emergency services, technicians or local authorities, this beacon cone slips easily into a trunk, cupboard or bag.

High visibility day and night

Thanks to its retro-reflective strips and bright orange color, the telescopic cone ensures optimum visibility, even in low light or at night. It is also equipped with a slot on the top for an optional flashing light, to enhance signaling.
