Skipper tip wall clip - Permanent attachment for marker tape

The **Skipper tip wall clip** is a sturdy bracket designed for mounting Skipper marking tape on a vertical surface. As a specialist in industrial safety equipment, **MMF Protection & Sécurité** offers this sturdy clip, ideal for securing high-risk areas, building sites, warehouses, parking lots or industrial sites.

Technical specifications of the Skipper wall clip

- **Dimensions:** 100 × 80 × 19 mm
- **Weight:** 40 g, lightweight base
- **Material:** aluminum or high-grade steel
- **Fixing:** 4 screws for secure mounting on pierceable walls
- **Compatibility:** Skipper tape nozzle and associated reel

The benefits of the wall clip for safety & protection

- Permanent mounting for stable, continuous beaconing
- Wall mounting enhances safety by maintaining optimum ribbon tension
- Robust construction - designed for long-lasting signage
- Quick and easy installation (drilling + screwing)
- Cost-effective, environmentally-friendly solution that can be reused for future applications

Recommended professional applications

Recommended by **MMF Protection & Sécurité** for the following applications:

- Industrial areas and warehouses
- Construction sites and urban development
- Parking lots and loading/unloading bays
- Logistics centers, airports, railway stations
- Railway facilities, agricultural or forestry areas

Why choose this Skipper wall clip?

- **Enhanced safety:** guarantees lasting tension on the tape, preventing it from loosening or falling out
- **Professional reliability:** materials and fastenings for intensive use
- **Ease of use:** easy assembly for immediate, stable marking
- **Guaranteed compatibility:** tailor-made for Skipper tapes and reels
