Wall mounting bracket for Skipper™ signalling tape

The Skipper™ wall bracket is designed to securely fix Skipper™ retractable tape cassettes to walls, poles or flat surfaces. This essential accessory makes it possible to quickly install a permanent or temporary signage and marking system in all professional environments.

Made from robust, impact-resistant polymer, the wall bracket guarantees excellent durability indoors and out. It makes it easy to secure work areas, mark out construction sites, delimit hazardous zones or organize logistics areas. Thanks to its full compatibility with the Skipper™ range of accessories, it provides a modular, scalable solution for improving safety and visibility.

Technical features of the Skipper™ wall bracket

The bracket is made of high-strength polymer with UV protection. It measures 120 x 120 x 55 mm and is fixed by three screwing points (screws not included). The color is black. It is compatible with all standard Skipper™ ribbons and accessories.

Advantages and benefits for your installations

Wall mounting is quick and easy. The bracket offers high impact resistance and adapts to outdoor conditions. It is particularly recommended for industrial sites, warehouses, construction sites, events and sensitive areas. This solution optimizes the safety and regulatory marking of your professional areas.

Fields of application

The Skipper™ wall mount is used in industry, public works, fire safety, maintenance, railway areas, logistics storage and access control.
