

## 700 mm storage box for portable shower

### 70 Series Safety Box - Reliable storage for portable shower and emergency equipment

The **70 Series** Safety Box is designed for professionals looking for a sturdy, durable solution to protect a **portable shower**, **first-aid supplies** or other safety equipment.

Made from high-density polyethylene (HDPE), this enclosure offers excellent resistance to impact, UV, corrosion and harsh outdoor conditions.

#### This model is particularly recommended for :

- Protecting and storing a portable emergency shower
- Storing an easily accessible fire extinguisher
- Keeping sensitive equipment exposed to dust, moisture and the elements in good condition

#### Key features :

- Sturdy polyethylene material suitable for industrial environments
- Highly visible green color for immediate identification
- Secure latch closure with padlock option (see different locking options)
- Quick opening for immediate access in case of emergency
- **Dimensions in mm: Height 700 x Width 300 x Depth 255 - Weight 4 kg**

#### Applications :

- Industrial sites and ATEX zones
- Intervention and rescue vehicles
- Fire safety and first-aid installations
- Construction sites and outdoor storage areas

When you place your trust in MMF, you benefit from technical advice, rapid delivery and a **professional after-sales service** dedicated to the safety of your installations.
