

## 720 mm storage case for absorption kit

### 70 Series Safety Cabinet - Robust storage solution for emergency equipment

The 70 Series safety cabinet is specially designed for demanding industrial environments where protection of emergency equipment is essential. It enables the secure storage of an absorption kit, first-aid materials, or any other safety equipment sensitive to external conditions.

#### Robust design for extreme conditions

Made from high-density polyethylene (HDPE), this case offers exceptional resistance to impact, chemicals, UV rays and the elements. Its watertight, durable design makes it an ideal choice for high-stress environments such as construction sites, outdoor storage areas or ATEX-risk sites.

#### This model is particularly recommended for :

- Safe storage of a portable emergency shower, protected from dust and moisture.
- Storage of a fire extinguisher, easily accessible in an emergency.
- Protecting critical equipment that needs to be accessed quickly and kept in good condition, even in difficult conditions.

#### Technical specifications

- Made of high-strength polyethylene (HDPE), compatible with industrial environments
- High-visibility green color for immediate identification in emergency situations
- Secure latch closure, with optional padlock or key under glass depending on version
- Quick, ergonomic opening for easy access to contents
- Dimensions: **Height 720 mm x Width 565 mm x Depth 270 mm**
- Weight: **8 kg**

#### Recommended applications

- ATEX zones and industrial sites

- Intervention and rescue vehicles
- Fire safety systems
- Outdoor storage areas or temporary worksites

**When you choose MMF, you benefit from :**

- personalized technical advice tailored to your specific requirements,
- rapid delivery throughout France,
- professional, responsive after-sales service specialized in industrial safety.
