

830 mm storage box for emergency equipment

80 Series safety cabinet - Enhanced protection for emergency equipment in industrial environments

The 80 Series safety cabinet is a robust, reliable storage solution designed for industrial environments where protection of emergency equipment is paramount. The box is ideal for housing an absorption kit, first-aid equipment or a portable emergency shower, protected from dust, moisture and external aggression.

Heavy-duty structure for extreme conditions

Made from high-density polyethylene (HDPE), this case offers excellent resistance to impact, chemicals, UV radiation and severe climatic conditions. Its watertightness and sturdiness make it ideal for portable showers or fire extinguishers on construction sites, outdoor areas, logistics warehouses or ATEX-risk zones.

Recommended main uses

This model is particularly suitable for :

- Storage of a portable safety shower, protected from moisture and dirt.
- Storage of a fire extinguisher, with quick access in case of emergency.
- Protecting any safety equipment that needs to be kept in good condition in demanding environments.

Technical specifications

- Material: High-strength polyethylene (HDPE), suitable for industrial environments
- Color: High-visibility green for immediate location
- Closure: Secure latch with optional padlock or key under glass depending on model
- Access: Ergonomic opening for rapid intervention
- **Dimensions: Height 830 mm x Width 310 mm x Depth 265 mm - Weight: 5.5 kg**

Application areas

- Industrial sites and ATEX classified areas
- Intervention vehicles (fire, security, maintenance)
- Fire safety installations (indoor or outdoor)
- Outdoor storage areas and temporary worksites

Why choose MMF Protection et Sécurité?

With MMF, you benefit from :

- Personalized technical advice, tailored to your specific needs and field constraints
- Fast delivery anywhere in France, on site or in our warehouse
- Responsive after-sales service, specialized in industrial safety equipment
