Fire extinguisher cart for industrial sites

The **fire extinguisher** cart is a complete mobile solution, ideal for ensuring **rapid intervention in the event of fire**. Designed for demanding professional environments, it can **carry two fire extinguishers (up to 12 kg each)**, a **fire bucket** and integrate a **warning sign or audible alarm**.

Its one-piece, rotomolded plastic structure is **anti-corrosion**, **anti-UV** and **highly impact-resistant**, making it perfect for use in **outdoor or industrial environments**.

Equipped with **Ø200 mm solid wheels** and an **ergonomic handle**, this **fire extinguisher cart** moves easily even on uneven ground, gravel or small steps. Its **drained base grid** ensures better hygiene and stability of the equipment transported.

This cart is perfectly suited to **logistics warehouses , parking lots**, **industrial sites**, **ERP**, **service stations** and **outdoor storage areas**.

Key features

- Capacity: 2 extinguishers up to 12 kg + bucket + signage panel
- Structure: ultra-resistant rotomolded plastic
- Mobility: Ø200 mm solid wheels
- Ergonomics: robust guide handle
- Safety: space for additional manual alarm or siren
- Bottom grid: water drainage, optimized cleanliness
- Flat back: compatible with wall storage or narrow passageways

Why choose thisfire extinguisher cart ?

Because it combines **mobility, visibility and safety**. Its shock- and weather-resistant design makes it ideal for **industrial sites, warehouses, construction sites or ERP**. Its **large-diameter solid wheels** and **ergonomic handle** make it easy to move around on any type of floor. The FireKart lets you group all your fire-fighting equipment in a single mobile unit, ready for action at a moment's notice. A reliable and durable choice to reinforce your **mobile fire protection** system.
