Universal wall bracket for breathing apparatus

Universal SCBA holder: stability and safety for your SCBA

This wall bracket is designed to hold any SCBA with a single cylinder, including carbon-fiber models. It provides a secure, reliable hold to protect your breathing equipment, while ensuring rapid access in an emergency.

Accessory compatible with 850 mm SCBA case

This bracket is the interior accessory for MMF Protection & Sécurité's 850 mm SCBA storage case. It provides a stable attachment inside the case to hold the breathing apparatus in position during transport or storage.

Robust structure with anti-scratch coating

Made from high-strength steel, this holder features a nylon/plastic coating that resists wear and scratches, protecting the cylinder from friction and impact. Ideal for use in demanding industrial environments.

Quick installation in cabinet or on wall

Delivered ready-to-install, this wall-mounted bracket is easy to install, thanks to specially adapted screws. It can be mounted inside an enclosure or directly on a wall partition, depending on the needs of your site or fire safety station.

Ideal for fire and respiratory safety in industrial environments

This universal holder is perfectly suited to warehouses, ATEX zones, chemical or petrochemical sites, and any location requiring reliable, tidy respiratory protection equipment.
