

Wall-mounted box for 12 kg extinguisher

Product features:

Reference: -
EAN13: -

Locking: Clé sous vitre, Poignée en T

The Jonesco 85 FS extinguisher box is designed to provide robust protection for a **12 kg** extinguisher, while guaranteeing rapid access in an emergency situation. Its front loading and wide T-handle (or glass break system depending on version) ensure immediate intervention. Made from rotomolded, UV-resistant polyethylene, the box is shockproof, corrosion-resistant and weatherproof, making it suitable for both indoor and outdoor use.

The reversible door allows flexible installation on the left or right. Two polycarbonate windows filter UV rays for easy visual inspection without opening the enclosure. An automotive rubber gasket provides effective protection against water and dust. The box includes a wooden shelf (T-handle version) and can be fitted with a factory-installed alarm for added security.

Technical specifications

Capacity: 12 kg extinguisher
