

Aries tactical force tool

This ram tool is a compact, powerful **force and penetration tool**, specially designed for rapid tactical interventions requiring a **single-seat black ram**. With its robust design and compact size (61 cm long), it enables a single operator to perform forced entry on light to medium-reinforced doors.

Its heavy steel body has a **black Plastisol** coating, offering excellent resistance to corrosion and impact. The integrated side handle distributes impact energy evenly and provides a secure grip, even when wearing gloves.

This tool is ideal for law enforcement, intervention teams (RAID, GIGN, SWAT), firefighters and emergency services working in urban or residential environments.

Technical specifications

Length: 61 cm (24")
Width: 14 cm
Height: 19 cm
Weight: approx. 14 kg
Coating : Impact- and corrosion-resistant black Plastisol
Material: reinforced steel
Design: side handle for single-person operation
Target: light to medium doors, standard or lightly reinforced frames

Areas of use

Used by intervention units, police, fire and rescue services, this penetration tool enables efficient entry in emergency situations, searches or rescue operations.
